Experience

Buildable (*Software Engineer*)

March 2022 - Present

- Full stack engineer on many different projects, from mobile MAUI/Flutter applications with admin portals to complex Vue powered webapps.
- Kick-started projects by setting up servers, creating pipelines and configuring deployments and databases. Created schemas and designed frontend solutions.
- Worked with clients and designers to create good looking, reliable products for stakeholders.
- Trained and achieved AWS related certificates, and worked with AWS to provide reliable, scalable solutions.

EtherForm (*Software Engineering Contractor*)

November 2022 - September 2023

- Designed and built the Nuxt3 GUI frontend for a channel reacting software, creating a 150% increase in efficiency of working with the API.
 - Developed and implemented the Sensor Resource Manager, a critical component of the company's software infrastructure, which helped optimize resource allocation by 50%.
-

Projects

Catholic Benefits Association Policy Analyzer (*Angular, .NET, SQL, LLM*)

- Tool for analyzing insurance policies with AI and ensuring they align with Catholic values.
- Primary developer, created the web-app tool from the ground up, made the database schema, setup the servers, etc.
- Integrated with various LLM providers to efficiently process policy documents in custom chat service with user prompts.

Flip Discovery (*Flutter, MAUI, .NET, SQL*)

- AI powered book/author discovery app with social features like shared book shelves and friends lists.
- Improved custom AI algorithm for building likeness between books and finding similar ones based on scores.
- Primary developer of new social features, increasing user retention by 40%, and increasing new user sign-on by 25%.
- Lead developer on new Flutter rebuild of the app, increasing new feature development speed by over 150%.

Donum Mobile (*Angular, Flutter, .NET, SQL, Stripe*)

- Mobile donation and parish newsboard application for the Roman Catholic Archbishop of Boston.
- Initialized the project, created initial schemas and iterated upon them. Setup servers and pipelines.
- Started the mobile app, hooking up to our API and creating architecture for an improved developer experience.

Slidermetrix (*Vue.JS, Vuetify, AWS, .NET, Kinesis*)

- Complex data collection and aggregation software for dial testing.
- Worked on optimizing legacy code, reaching up to 300% increases in performance.
- Worked with AWS kinesis streams to ingest thousands of requests per second.
- Redesigned the whole frontend from the ground up with Vue, cutting down average load times by 50%.

CatholicTV (*Angular, Tizen, .NET, Android Studio (Java), Swift, UIKit, php*)

- Series of consumer applications from TV to mobile to web.
- Created multiple projects from scratch, deploying and hosting on relevant platforms.
- Increased user retention by 23% across all platforms, and

Cranny GUI (*Vue3, Nuxt3, Drogon, AFSIM*)

- Built from the ground up to consume large amounts of data and efficiently present it with meaningful graphs and forms.
- Nuxt3 frontend for use with AFSIM data simulations consuming data from C++ API and hosted with Drogon.

Certifications

- AWS Certified Cloud Practitioner
- AWS Certified Developer - Associate

Skills

- Angular/TypeScript
- Flutter
- AWS
- C#/.NET
- C++
- MAUI
- Vue/Nuxt3
- MSSQL/SQL
- Firebase/GCP
- JavaScript/NodeJS
- Python
- php

Education

Oregon State University

September 2017 - December 2021

Bachelor's of Science in Computer Science. Artificial intelligence path.
